ASL DIRTSTOPPER

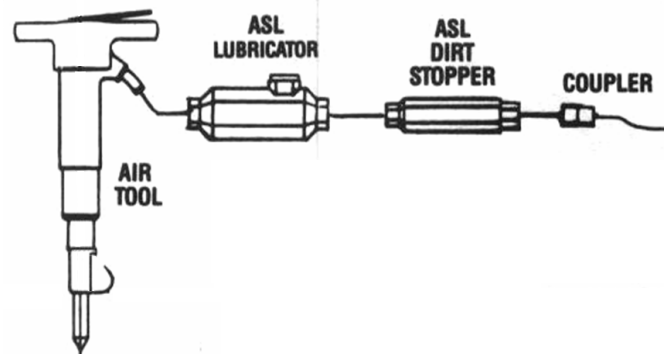

STOP CONTAMINATION & SAVE MONEY ON REPAIRS

Pneumatic tools require filtration and lubrication. Many times the air hose couplings are disconnected and dropped in the dirt. They are usually never clean before they are reconnected. Well, there goes the investment of your equipment.

CLEANING

It is not required that the dirt stopper be dis-assembled for cleaning. The total assembly can be clean in a solvent or in soapy water, then back flushed with air to remove contaminates. The DIRT STOPPER is available in 1/2" BSP, 3/4" BSP, 1" BSP.
