ERGONOMOMIC BREAKERS

28VRS

34VRS

- The components in all the Macdonald breakers are made from drop forged alloy steel, which gives maximum durability.
- The parts are interchangeable in the various models, thus minimising the spare parts inventory required to service the breakers.
- Macdonald breakers are designed to withstand the extreme demands of the hire and construction industry.
- The floating handle design reduces vibration to the operator by 85%.
- This means that an operator can use this for a much longer period of time (50 times longer) and still remain in the safe vibration exposure levels
