PNEUMATIC SUBMERSIBLE PUMPS

The pneumatic submersible pumps are available in two sizes and are designed with performance and durability as key attributes.

This makes them ideal for removing water from trenches, ditches, manholes, industrial sumps and excavations.

They will pump down to within 7/8' (22 mm) from base.

- Single-stage centrifugal units driven by powerful vane motors.
- Double seals protect bearings and motor from water and mud.
- Integral oiler provides continuous lubrication.
- Integral strainer, air inlet valve.
- Bronze impeller.
- Cast-iron housing.
