# STOMPER

## DOWN OR UP – STONE'S 4 CYCLE STOMPER STAYS ON THE JOB LONGER

4-cycle Stomper® model XH730 is ideal for every job site compaction need from narrow trenches to areas requiring optimum impact. Leading-edge, innovative technology and precision components means a line of well-balanced, smooth running, dependable rammers.

Powered by a 4-cycle Honda engine, which is fully EPA approved meeting the toughest emission standards. The engine and carburetor have been specifically designed for rammer applications. The engine is easy starting and eliminates use of 2-cycle oil or pre-mixing of fuel. The engine design also allows the Stompers to be laid down in any direction for easy transport and provides worry-free starting when standing.

Stone 4-cycle Stompers' unique design combines precise spring force, crank throw and weight to produce maximum impact force.

Each feature:

- A contoured, sound-absorbing, snap on cover which protects both the operator and machine yet allows easy access for service.
- An innovative modular design that allows easy access to critical parts.
- Durable, see-through 3 qt. polyethylene fuel tank for at-a-glance fuel checks.
- Extra thick, cushioned handgrips absorb vibration to the operator.
- Superior rubber shock mounts further reduce vibration.
- Conveniently located heavy-duty, ergonomic throttle provides maximum durability for trouble-free operation.
- Quadruple fuel filtration system virtually eliminates contaminated fuel supply.
- Extra-large, heavy-duty, air filter system produces optimum airflow and maximum filter surface

### Specifications

Model	L x W x H (cm)	Weight (kg)	Shoe Size (cm)	Power (kW)	Engine type	Impact Force (kg)
XH730	29.7" x 14.9" x 42" (75,4 x 37,9 x 106,7)	140 lbs. (64)	11" x 13" (28 x 33)	Honda GX100	4-cycle gas	3100 lbs. (1409)

RIGHT BUILT – BRED TOUGH – BORN TO WORK
