# TEXAS FILTER LUBRICATORS

One of the most common repairs an air tool undergoes is disassembly to clean foreign material out of the valve assembly.

In-Line Filter Lubricators help prevent this from happening. The 40 micron filter can easily be cleaned or replaced. These filter lubricators can be used on all air tools requiring up to 70 CFM.

Lubricator filter unit is an integral unit.

- Reduces downtime and prevents costly repairs.
- Extends air tool life.
- Casting design prevents breakage in filter to lubricator union.
- Adjustable metering valve.
- Sight disk in housing to visually inspect oil level.
