# CARPET DRYER

These carpet dryers are conveniently small and extremely lightweight yet powerful enough to create air flow beyond your expectations.

They are traditionally used to float carpet and to dry floors, when carpet pad has to be removed due to water damage.

They have been engineered to be durable, long lasting and high performing. They have been rigorously tested for heavy duty use and proudly bear the UL and CUL listings for safety.

- Electrical components are protected by a steel cover
- Metal components are epoxy coated to prevent corrosion
- Durable and virtually indestructible housing is made from high density polyethylene.
- Extra large inlets to increase air flow
- Snout crafted to reduce air flow loss and turbulence

## TWO LEVELS OF PROTECTION

- Thermal Overload Electrical device is built right into the motor. When tripped, unit shuts off and cools down to a safe operating temperature, then restarts automatically.
- OSB (One Shot Backup) - Motor permanently shuts off should an electrical overload occur beyond the motor's safe operating parameters.

Model	Voltage	Motor	Amps	RPM	Speeds	Max SP	Weight
ABG-VC	240V	¾ HP	4.8	1550	2	2.50	16.8 kg
