# BEX AN-FO LOADER

The BEX Model "P" Loader permits the use of low cost AN-FO blasting agents in small holes where formerly only stick powder could be used.

The prills are loaded into the hole with such force that they rupture giving a very high packed density of the loaded ANFO.

Because of this high density and lack of voids, propagation of the blast will continue even in holes as small as one inch (25 mm.) diameter.

This density minimizes misfires and improves fragmentation, resulting in lower mucking and crushing costs.

## Features:

- One-man operation.
- Easy to maintain.
- Weighs 5 Kg (11 lbs) in total.
- Strong, rigid, fixed legs for stability.
- Stainless Steel Fasteners.
- 2 metre control hose.
- Full size hopper holds - 25 Kg (50 lbs).
- Operating Air Pressure - 60 to 120 psi.

Loading is extremely fast - as little as 15-20 seconds per hole (Does not include priming time.)

Because of its reliability and speed this loader has received a glowing acceptance from the people actually operating it, as well as from mine management.

## DISTRIBUTORS OF:

\*Edco Surface Preparation Tools \*Macdonald Air Tools \*Timberking Chainsaws \*Rock Drills \*Drilling Equipment \*Picket Post Driver \*Air Hose & Fittings
