# PORTABLE PETROL PUMPS

## MODEL - FIRE1ROB

### Ideal for:

- General Purpose De-Watering
- Multiple-Purpose De-Watering
- Construction Job Site
- Rental
- Agricultural

A centrifugal pump works much same as sucking on a straw. An engine turns an impeller, forcing water around it out a discharge port. They deliver liquid at uniform pressure without shocks or pulsations, and can handle liquids with some amounts of small solids in suspension.

Having only one easy-to-repair wearing part (a seal) a centrifugal pump needs no lubrication, gears, pistons, or diaphragms.

These pumps are:

- Self-priming - No water required after initial pumping is done.
- Efficient, economical operation is assured by directly coupled pump.
- Durable - with ceramic-carbon seal and special cast iron impellers.

### Specifications (Model PKV101)

- Total Head (35 m) (115 ft) ()
- Maximum Delivery Volume (130 l/min) (34 U.S gal/min)
