QD6/9 TRASH PUMP

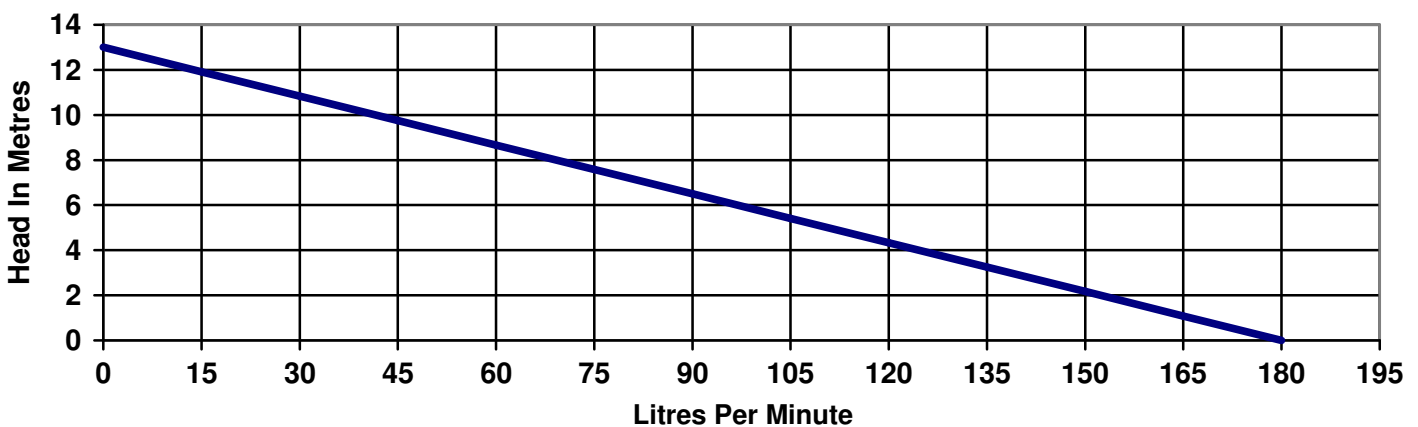

The ABG QD6-9 Trash Pump is a rugged, cast iron cased, electric submersible pump, powered by a single phase, 0.4 kW, 240v, 50Hz induction motor drawing 3.9 Amps. It is capable of handling solids to a maximum size of 25mm by virtue of its Vortex impeller design.

For safety, the pump features both in-built capacitor start and thermal cut out with automatic resetting, to protect the motor windings from overheating, either from current surge or mechanical blockage.

The pump and motor share a common stainless steel shaft with a double faced mechanical seal and intervening oil chamber for seal life in excess of 6,000 hours use. The oil chamber itself features an inspection plug for periodical testing of the oil. The condition of the oil can identify the condition of the pump seal, saving money on costly repairs to the motor.

The ABG QD6-9 Trash Pump is a solid 20kg unit reliable in its performance. Suitable for pumping of dirty water, as found in Civil Engineering and Construction, Mine Dewatering and General Hire applications, or fixed sump installations, when fitted with an optional automatic float control.

Maximum Capacity	12.5 m3/hr @ 0 m head
Maximum Head	13m head shut off
Motor Rating	0.5 H.P. (0.4kW)
Voltage	240V
Frequency	50Hz
Amperage	3.9Amps
Speed	2850rpm
Weight	20kg
Discharge Port	2" Camlock (offset)
