PROTECTED AGAINST OVER PRESSURIZATION.

The 150 psi gauge can not be damaged when a 2500 psi system is being checked. This design feature eliminates the need to know the pressure before testing.

SIMPLE YET RUGGED CONSTRUCTION.

The dust and moisture proof steel case is provided with a rubber bumper for shock protection. A hanger is also provided on the case back for the user's convenience.

COMPACT AND PORTABLE.

The GS-5 and GS-6 models are 6 1/2" and 8 1/2" in diameter. The GS-5 fits easily into the average tool box for instant availability.

SAVES TIME.

The three pressure ranges and one vacuum range provided in one case meet most routine hydraulic maintenance requirements. Provides multiple pressure readings for hydraulic, transmission and converter

While one hook-up connects all three gauges, the built-in gauge protector automatically protects the low and medium pressure gauges from high pressures. Each gauge is equipped with a high quality poppet valve.

The Multi-Gauge is available with two types of connections:

- (1) The standard braided copper, flexible high pressure hose with male 1/8" pipe universal swivel fitting and
- (2) Microbore flexhose and test point adapter (specified by U in the part number).
